3 Gift Orders 3.50
Gift Orders over 3 1.50

The 1936 Ford

Ford V-8 cars for 1936, details of which have just been announced by the Ford Company of Canada, Limited, reveal no radical changes in design but include a number of mechanical refinements and a striking new front end appearance.

Body lines which strike a new note in conservative streamlining, a new treatment of front end fenders and three important refinements in chassis engineering summarize the principal improvements. The 90 horsepower V-8 engine, of which more than 2,000,000 are now in operation, is unaltered.

Wheat Prices Lower

There have been substantial rains in Argentina and this has affected world wheat markets. At that Argentina cannot hope to produce a large crop, 180 million bushels being considered the peak of production. Argentine wheat supplies are dwindling and prices are high. Rosario being only 2½ and Mr. and Mrs. J. H. Hughes, have returned home.

Born—to Mr. and Mrs. John Shaws on October 20th in the Express Hospital, a daughter.

Bindloss Notes
[Too late for last week]

Mrs. Luck, of Calgary, accompanied by her daughter, Mrs. Thors, is visiting her daughter, Mrs. Herb, Gallop.

Mrs. Falconer, sr., of Calgary, is visiting her son, C. J. Falconer and family.

Mr. and Mrs. R. A. Vaughan, Mrs. M. Vaughan and Mrs. A. M. Piper, made a trip to Medicine Hat last week end.

Mrs. Falconer, sr., has returned to Calgary.

Mr. and Mrs. O. Fjeldstad and Mr. Odd Fjeldstad are spending a few days with friends at E-bow, Sack.

Mrs. Lloyd Kidd, and son, Jackie, who have been spending a few days with Mrs. Kidd's parents, Mr. and Mrs. J. H. Hughes, have returned home.

Born—to Mr. and Mrs. John Shaws on October 20th in the Express Hospital, a daughter.

Medicine Hat's New M.P.
Son of Noted Tree Expert

Alberta born and Alberta educated, Archibald Hugh Mitchell at 32, is another of the men in young, whom the movement, known as Social Credit has swept into office a year earlier than the average. He was 32 on September 14 last.

Born at Macleod he received his public and high school education at Coaldale and graduated from the Claremont Agricultural College in 1923. That year his family moved to British Columbia, where he worked for several months on a fruit farm which still thrives and in which he takes active interest.

Bought Fruit Farm

After studying scientific agriculture at the University of Alberta he bought a fruit farm of his own, but ran into financial reverses. During the following years he tried various lines of work including salesmanship, farming and landscape gardening. In the latter work he was following to some extent in the footsteps of his father, Archie Mitchell, founder of the Mitchell Nursery at Coaldale and organizer of the noted "tree planting" still used regularly by the Canadian Forestry Association. Mr. Mitchell, sr., was also well-known as Alberta's first chief wood inspector in 1905, and he died in 1928.

From 1926 until 1934, Medicine Hat's M.P., elects sold insurance in Regina. It was there, in 1933, he married Miss Lucile Barber, whom he had met in Lethbridge, where he was headquartered in 1925-29. Mrs. Mitchell before her marriage had been employed for several years on the commercial staff of the Alberta Government Telephones at Lethbridge and Medicine Hat.

Abandons Insurance

Archibald Mitchell returning to Medicine Hat in 1934, gave up life insurance in April of the present year in order to devote his full time to Social Credit. He still, however, has the privilege of using the initials C. I. U.—chartered life underwriter—after his name.

He first talked Social Credit with Herbert C. Boyd, M.A., of Edgerton, and the latter's son, Hugh Boyd, who was a reporter on the Regina Leader Post, before joining the publicity department of the Saskatchewan

W. L. Thompson

Arthur Henderson, noted British labor leader and president of the world disarmament conference, died Sunday, in London.

Helena, capital of Montana, was the scene of disaster caused by earthquake shocks over Friday and the weekend. Property damage is estimated at from 1½ to 2½ million dollars. There are citizens here who say they felt the tremors of the shocks which were also reported to have been felt in other parts of Canada.

Wheat Pool

He has one son, Ian Hugh Mitchell, a month old, son of Hugh Mitchell. His mother and two older brothers are still living at Oliver, B.C., while a sister, Miss Grace M. Mitchell, is taking a science course in nursing at the University of British Columbia.

One of Archie Mitchell's pleasant tasks was the sending of a telegram to his mother informing her of his victory

Skating Rink

A meeting in connection with

skating and hockey activities for the coming season, took place on Friday in the hotel tea room. It is understood that the town will have charge of the care-taking of the rink and are financing the lighting with lumber of the dressing room. Prices on skating tickets will range from \$1—according to school grades—to \$2 for adults, and \$5 family ticket. L. Hanna is appointed manager, and W. Crocker, secretary, of the rink.

Pantry Shower

The Hospital Aid are sponsoring a "Pantry Shower" in aid of the Hospital, to be held at the Nurses' Home, Tuesday afternoon, October 29th. Donations of fruits, pickles, jellies, etc., tea or punch from town and country will be very much appreciated. Support your local hospital!

Enjoyable At-Home

The Bindloss Women's Institute were guests at the home of Mrs. C. J. Moore, of Empress, on Wednesday, October 16. Mrs. Moore was assisted in the entertainment by Mrs. Anderson, Storey, Brodie and McEachern. A large number of ladies from Leland were present. Mrs. Angus McDonald presided over the business part of the meeting, and a paper was read by Mrs. Tabraham, on Halloween customs. A very enjoyable time was had by all.

Mr. J. H. Sturdy, principal of the Fort Qu'Appelle High School for the past fourteen years, is leaving at the end of 1935 to reside at Saskatoon, where he will take the office of secretary of the School Teachers Federation. At the teachers' convention held at Fort Qu'Appelle last week a presentation was made to Mr. and Mrs. J. H. Sturdy in appreciation of the services which they have rendered to the Balfour Educational association. Tributes of praise were also accorded to Mr. Sturdy by Mr. Castleden and Inspector R. L. Horning. Mr. Sturdy is well known throughout this district, having been the Farmer-Labor candidate in the last provincial elections—News, Wolseley, Sask.

School students have been fixing up the skating rink in preparation for winter sports activities

IN MEMORIAM

HUBBLETON—In loving memory of our dear wife and mother, Mrs. Geo. H. Hubbleton, who passed to the Great Beyond October 1, 1935.

Our precious to our hearts has gone,

The void we live in still;

The place we made vacant in our home

Can never more be filled.

Our Father in His wisdom called

The soul to go to heaven,

And though we search the body lies

The soul is safe in heaven.

—Sadly missed by husband and family.

Social Crediters to

Enter B.C. Election

Vancouver, Oct. 23—The British Columbia Social Credit League at a meeting Monday night decided to change from a federal constituency basis to a provincial constituency basis with the purpose of campaigning in the next general provincial election. The objective would be electing a Social Credit majority in Victoria.

In the Weyburn constituency several Liberal nominees are on the Conservative candidates nomination papers, two of whom were on the Liberal executive, and one signed the papers of both Liberal and Conservative candidates.—Ex.

Not having a vote in the federal elections, the inmates of the Home for Infirm on took a vote of their own on Monday with the following result: Liberals, 20; Conservatives, 15; Social Credit, 12; C.C.F., 2—Wolsey News.

Card of Thanks

I wish to take this opportunity of expressing my appreciation to my many friends and supporters for their loyal support and assistance during the recent campaign in the Canadian. My only source of regret is that the Kindergarten constituency will not be able to make her influence felt in forming the trade policy of the new Liberal Government at Ottawa.

However, I am very thankful that western Canada has elected a sufficient number of Liberal Candidates giving a well balanced representation to insure good government and to forward the interests of the western agriculturalists.

After several years of drought and depression many of the electors were prepared to believe that the election of a minority group could offer the best method of solving their difficulties, and I am quite prepared to abide by their decision.

THE EMPRESS EXPRESS

Aduwa Captured By Italians And Monument Erected

Aduwa.—Italy's 40-year-old goal of vengeance fell into the hands of II Duce's army Sunday.

General Maraviglia's soldiers, pincered by tanks, poured into the city to witness the aftermath of a disastrous defeat by an overwhelming Ethiopian force in 1896.

Ethiopian resistance, which had stoned flights along the route to Massawa, had advanced, met by the invaders at the gates of the city.

Immediately on the heels of the soldiers rolled army trucks, carrying in one stone monument carved in recent weeks by soldiers of a soul-turning tribe. The monument bears the words "To the fallen heroes of Aduwa."

The soldiers carried it in the principal square, and all cheered it.

The troops immediately took measures to protect themselves from possible sniping casualties from any Ethiopians lurking in the vicinity.

Later, Italy's tanks had entered the city, had been occupied, an official communiqué announced all Tigré province had fallen into the hands of Italy. Saturday's Italian losses in the advance alone numbered 1,000. Italian anti-aircraft troops killed and a number wounded.

The backbone of Aduwa's resistance was broken by aerial bombardment, which, some reports said, killed 2,500 men.

However, a body of 7,000 Ethiopians, with artillery, stubbornly defended the forest between Dara Taro and Amba Beera for hours until the superior numbers drove them out. The Ethiopians then continued a spasmodic defense from mud huts dotting the mountainsides.

News brought by reconnaissance parties made it clear that a big battle was imminent after the troops pushed farther south. Scouting planes reported two of the strongest Eritrean columns approaching Italian positions from 20 to 30 miles away, and it was believed the forces would clash near Makale.

Manitoba Road Program

Brandon, Man.—The hard-up road programme is proceeding eastward at the rate of about one mile a day, and the contractors are nearly finished with the job. It will be completed by October 1.

Mr. J. W. Brandon, who has the job between Sydney and Brandon, will be completed this fall and if weather conditions hold good. There are some rumors that the governments are considering the building of a highway of No. 1 highway west to the Saskatchewan boundary next year.

Bessboroughs Reach England

Retiring Governor-General Refers To Pleasant Relations With Canada

BESSBROOKHURST, Eng.—"I have never seen such a wonderful send-off upon leaving Canada," said Lord Bessborough upon his arrival at Southampton.

"The general manifestation of affectionate goodwill by the people of Ottawa, Montreal and Quebec on the way to embarkation touched us both profoundly."

"I can never be quite so grateful to the people of Canada from the time I left Canada for the last time in 1919." It was more than generous recognition of any service we may have rendered during the years I have been here," he added.

"I am very glad to be back again."

"We shall always follow Canada's fortunes with deep and affectionate interest. Our young son, born in Canada, will always be proud of his birthplace."

The retiring governor-general was given a civic welcome by the mayor of Southampton, G. Waller.

Gives Formal Consent

His Majesty The King Assents To Royal Marriage

LONDON.—His Majesty the King gave formal assent to the marriage of his third son, the Duke of Gloucester, to Lady Alice Scott.

Consent to the marriage was given under the great seal of the realm, the token of executive sovereignty.

The decision of Great Britain's strongest opposition party was taken at the party's annual conference.

The party supported the recent action of the International Trade Union Federation.

The decision of Great Britain's strongest opposition party was taken at the party's annual conference.

The party supported the recent action of the International Trade Union Federation.

The vote, taken by a card ballot at the party's annual conference, showed 2,900,000 for sanctions to 1,620,000 against.

The vote was greeted with resounding cheers from the convention floor, which had been for a day the scene of a bitter contest by a relay of speakers.

Herbert Morrison, winding up the debate for adherence for the use of sanctions, asserted:

"Military sanctions cannot be ruled out. If they are ruled out you may weaken the power for peace of the League."

War Risk Rates Doubled

London.—War risk rates on ship's cargoes by way of the Red sea and the Mediterranean to Italy have been doubled. Such cargoes' insurance was quoted at 10 shillings per £100—one-half of one per cent.—compared to five shillings per £100 to other countries.

New Cancer Treatment

Kingston Doctor's Method Is Received

MONTREAL.—A treatment for cancer, in which malignant cells are said to be digested by a method resembling the natural digestive processes of the human body, is described in the Canadian Medical Association Journal by Henry C. Connell, M.D., of Kingston, Ont.

The Journal, official organ of the Canadian Medical Association, prints also a column editorial stating that this new work "cannot be lightly passed by."

It report describes 29 human beings, all given up to die of cancer, injected intravenously with his digestive juice in May, June, July and August, this year.

Two have returned to work apparently well. Four died. The pain of five is completely gone. The pain of nine others is less. In a number of cases the cancerous growths appear smaller.

In about one-third of the cases little change is apparent.

BRITISH LABOR PARTY IN FAVOR OF SANCTIONS

BRIGHTON, Eng.—The British Labor party lined up in favor of the use of full League of Nations sanctions, even of a military nature, in the event of Italian aggression in Africa.

At a margin of 20 to one the party supported the recent action of the International Trade Union Federation.

The decision of Great Britain's strongest opposition party was taken at the party's annual conference.

The party supported the recent action of the International Trade Union Federation.

The vote, taken by a card ballot at the party's annual conference, showed 2,900,000 for sanctions to 1,620,000 against.

Herbert Morrison, winding up the debate for adherence for the use of sanctions, asserted:

"Military sanctions cannot be ruled out. If they are ruled out you may weaken the power for peace of the League."

Would Fight For Country

Italians In Vancouver Offering To Join Army

VANCOUVER.—The Italian residents of Vancouver are offering themselves for service in the armies of Italy, Pietro Cobertaldo, acting royal Italian vice-consul here, declared.

"About 15 men have so far requested me to find their names as volunteers to fight for Italy," said Mr. Cobertaldo. "I do not believe the practice of Italy to call the colors residents in foreign lands, but they can volunteer."

He said he had had similar requests from English-born Canadians.

Fliers Go To Gibraltar

Thirty Men Added To Royal Air Force Detachment

GIBRALTAR.—Thirty British fliers were added to the Royal Air Force detachment station here. The fliers arrived on the steamer Kaiser I-Hind, on which Air Marshal Sir Robert Brooke-Popham was a passenger. Sir Robert, commander-in-chief of Britain's air defense forces, conferred with flying officers and then left on the same liner for Malta.

The government arranged to import 500 hogs weekly from the Netherlands. A large order for lamb also was placed with Dutch dealers.

Tes last farm census showed 22,500,000 hogs in Germany compared with 25,000,000 a year ago.

Faces Perjury Charge

EDMONTON.—Alta. John Shadley of Newmarket, Ont., who has been charged with perjury, was a British subject who voted in the Alberta election Aug. 22, was remanded for trial at the November sittings of the supreme court when he appeared before Justice L. O'Connor on a charge of perjury. He was freed on \$2,000 bail.

BRITISH LABORITES RESIGN

Sir Stafford Cripps, Left, And Lord Ponsonby, Right, Who Have Resigned

SIR STAFFORD CRIPPS, left, and Lord Ponsonby, right, who have resigned from the executive committee of the British Labor Party, in protest to the party's approval of the Government's policy in demanding imposition of sanctions against Italy if Ethiopia is attacked.

ITALY'S DELEGATE

Here is a close-up of Baron Alois Mussolini's delegate at Geneva, who is very much in the news at the present time.

Conspirators In Revolt

Piotr Kuk, King Of Bulgaria Is Nipped

Sofia, Bulgaria.—Conspirators in a revolt which the government claimed it had nipped, planned to assassinate King Boris III, it was learned upon good authority.

There was no official revelation of details or proof that an attempt to have been made on the king as he appeared before his subjects to review a parade in celebration of the anniversary of his accession to the throne. About 100 persons among a number of persons attempted.

Marching soldiers were to have been without ammunition, it was understood, and in the confusion following the attack the plotters hoped to take command of the arsenal and public buildings.

At the same time the capital learned of the conspiracy, it received a report from Bulgaria saying former prime minister Dimitar Radev was arrested the second time he had been in custody this year.

Radev was under a rule of bayonets with martial law declared throughout the country and the capital itself under a state of siege.

Food Shortage

Enforce Regulations Against Food Hoarding In Germany

BERLIN.—The shortage of butter, milk, lard and other basic foodstuffs became acute in Germany as authorities moved to impose a dwindling supplies an enforce regulations against food hoarding.

Long lines of shoppers formed at dairies and butchers' shops demanding milk, lard and other food. Police regulations limiting the amount of rationing regulations were enforced.

During the last few days dairies have been rationing food, selling only a quarter of a pound of butter for each customer.

The government arranged to import 500 hogs weekly from the Netherlands. A large order for lamb also was placed with Dutch dealers.

Tes last farm census showed 22,500,000 hogs in Germany compared with 25,000,000 a year ago.

Round The World Flight

Clyde Pangborn Contemplates Trip Over Northern Route

BISMARCK, N.D.—Clyde Pangborn's contemplated non-stop world flight next fall, he said here, will be a 110,000-mile trip if all goes well on a north route.

"I'll skip Japan this time," he said, recalling two months spent in a Japanese prison in 1931 for flying over a fortified area without official sanction. Pangborn, now on a commercial flight, was en route to New York.

Will Retain Name

HALIFAX.—In future there can be no further objection, legal or otherwise, to use of the name "Presbyterian," said Dr. Frank Baird of Pictou, N.S., told the maritime synod of the church. Dr. Baird, clerk of the synod, said court decisions had settled the argument, which arose when some Presbyterians entered the United Church of Canada.

Call Up Reserves

ATHENS.—The Greek government called up three military classes

to report for service as a pre-emptive measure in view of the international situation.

Mussolini Would Talk Peace If Warships Were Withdrawn

Studying New Proposal

Winnipeg May Decide To Elect Its Street Signs

WINNIPEG.—With a deep breath and blinked his collective eyes, Winnipeg's public utilities committee studied anew a proposal for renovation of city street identification at a cost of \$100,000. The cost left the committee aghast, it did not definitely reject the proposal. The matter was referred to the city engineer for a report.

"We will propose to the city council to have signs put up at intersections, at least over the border regions of Eddy and

Any such proposal, they said, should have been made through Geneva, and in any case would have practically no chance of meeting with British approval if it involved an unilateral mandate over any part of Ethiopia.

If the suggestion of annulling military measures is accepted, II Duce said, Italy will dismiss the matter to the League of Nations.

Edmonton.—Warning to his followers not to be greedy for personal gain or impatient for fulfillment of campaign promises, was issued by Premier William Aberhart at a banquet and meeting of Alberta Women's Social Credit League.

"Is your idea of victory getting jobs with the government for every Social Credit worker?" demanded Premier Aberhart at a banquet and meeting of Alberta Women's Social Credit League.

"Is your idea of victory reaching out and snatching something for yourself?"

"No. Our victory must be securing the necessities of life for everybody."

"If you think the Social Credit victory is finished, you are off the track. Up to October 14 we will have fairly easy sledding, but after that, ready to stand the fight and be beaten," he concluded.

Italy Starts War With Bombardment Of The Ethiopians

Halifax—In Future There Can Be No Further Objection, Legal Or Otherwise, To Use Of The Name "Presbyterian"

DR. FRANK BAIRD, of Pictou, N.S., told the maritime synod of the church. Dr. Baird, clerk of the synod, said court decisions had settled the argument, which arose when some Presbyterians entered the United Church of Canada.

ATHENS.—The Greek government called up three military classes to report for service as a pre-emptive measure in view of the international situation.

Attack On Ethiopia

ADDIS ABABA.—The Ethiopian government announced invading Italian fliers bombed historic Aduwa killing women and children, signaling the start of a long-awaited war.

A general mobilization order came from Emperor Haile Selassie's office. Although it was reported in official circles the Italian minister had been given his passports, they were held pending the arrival of Italian fliers.

An appeal was made to the diplomatic corps to carry the demands from the country was cancelled but officials said: "We may give the passports at any time." The emperor's imperial guard was thrown about the Italian legation to safeguard it.

Emperor Haile Selassie telegraphed a full report and protest to the League of Nations. He asserted a Red Cross hospital was the target of the raid.

A government announcement said 100 houses at Adigrat and 15 at Aduwa, where Ethiopia crushed the Dervishes, were destroyed.

Emperor Haile Selassie's declaration of war was welcomed by the King of Kings was read from the palace balcony by the chancellor, Halle Woldegerm, after a session of the crown council. Drums and town criers carried news of the mobilization.

Program Of Laboratory And Field Work Investigation Of Minerals In Canada

Realizing the value of modern methods and technique in mining operations, the Canadian Department of Mines has in full swing a program of mineral investigation and field work. This will affect all branches of Canada's mineral industry. Laboratory tests and experimental work are under way that relate to such distinctly separate needs or ends as the increasing use of Canadian coal in the domestic markets, the revising of ore treatment processes for use in Canada's new gold mills and the improvement in quality of ceramic ware.

The field work is extremely broad in scope. Officers have been placed in strategic areas to gain first-hand information on the varied activities of the industry. Field work includes the investigation of the mineral industry in Ontario and British Columbia; a field study of the clay, and other high quality clay resources of certain areas in Northern Ontario; a study of the mineral resources in Quebec, the Prairie Provinces, and British Columbia; a survey of industrial waters in Ontario and Quebec; and the investigation in Ontario of mineral products used for shingle bricks, mineral filters, and sand blasting.

The heavy volume of tests and experimental work on gold ores continues as the feature of activities in the ore dressing and metallurgical laboratories. Treatment processes have been devised for practically all of the gold mining plants that have entered production during the year. Much of the work is in the new mineral processing units, experimental tests on ores and products from established gold producers. Test work on base metal ores has been confined largely to the development of new metallurgical processes to provide with greater ore reserves, and to problems relating to higher metal recoveries at established producing properties.

Ceramic investigations are mostly in the nature of laboratory tests and experiments. With the keen competition existing at present, manufacturers are making every effort to improve their wares in order to maintain their market position. Laboratories are being utilized more and more due to the greater use in the clay industries of scientific principles, the introduction of new processes, and the development of new products.

Judging By Signs

Prospect For Long and Hard Winter In Manitoba

Manitoba's going to have a long and hard winter and it's coming earlier than usual, according to the folks who cast their eyes around about this time each year, seeking nature's portents of the season ahead.

Winter will come early this year, these nature lore experts declare, and point to the fact that the Canada geese returned to the prairies before the full of the harvest moon, which always follows the autumnal equinox. Other signs are the flocking of the ducks to the prairie stubble fields long before cold weather and the busy squirrels storing up large quantities of food.

The weather prophet after gravelly soil and the mud chimneys houses of the crawfish, better known as crabs, along the margins of ponds and sloughs, declare that this year the little studly denizens are bigger than usual. They say the observers, indicates a cold winter.

New Traffic Order

London Motorists Must Not Squeeze To Avoid An Animal

England's humane societies are up in arms over the traffic ministry's latest order that motorists must not squeeze an animal.

The order was issued after a motorist, fined \$50 for dangerous driving, pleaded he had swerved to avoid a dog. "The motorist who does so is an animal lover," he does not know what human lives he might endanger," said the judge.

Owners of pets have sought to have the edict modified, arguing that a driver could in many instances dodge a dog without endangering traffic.

A useful expert editor for Canada drivers' rights has been opened up in the British West Indies. 160 boxes have gone forward during the first week of August.

Gold mining centres in Soviet Russia now number 1,200.

Barley For Growing Lambs

A Good Way Of Marketing Low Grade Grain

One of the best ways of marketing low grade and weedy whole grain is to use it for growing lambs during or wintering the sheep. Sunflower seed is a very valuable supplement to the ration when fattening lamb, but in the tests outlined here the only roughage used was straw. Three ewes have been conducted by the Dominion Experimental Station at Scott, Saskatchewan, in comparing barley with oats for wintering female lambs held over for breeding purposes. Two lots of sixteen ewes each were used. The lots were divided as evenly as possible, according to individual weights and breeding, and the rations were identical except that one lot received oats and the other barley. The average weight of grain fed was daily about one pound per head daily, as the lambs were not to be marketed.

The trials lasted on an average 91 days, and in some cases when the lambs were getting oats and 14 pounds when they were getting barley. It was observed that the gains were affected by the quality of either grain used as although barley gave higher gains in this experiment, it was probable that good quality oats would be superior to medium or low grade barley, pound for pound, in feeding lambs. The relative price and quality of each is the chief factor in deciding whether to use for growing ewe lambs.

Unique Experience On Line

Flying Fish Took Leap Through Fortune Into Cabin

Spectacular suicide of a two-foot flying fish which leaped fully 40 feet out of the sea, soared through a main deck port hole and dashed its brain out against the ceiling of a stateroom was responsible. The watchmen in the factory were convicted of accepting chocolate bars as bribes and were sentenced to from one to two years' forced labor. Three other women workers who aided in the theft were ordered to spend three to seven years in prison.

Freedom Of The Press

If journalists did not have 100 per cent control of the press of their country, his power would be more than halved. Freedom of the press, like air and water, is not appreciated unless it is taken away, just as the open port and freedom of speech through it, said Staff Captain J. F. Patrick, who described the incident as unique in his 40 years of seafaring.

Another Name For Worry

Fear Enters Large Into Our Anxiety Over Greece's Problems

Measuring things by their influence on human happiness, worry must be put down in the front rank of bad habits.

The level of anxiety is that it actually concerns matters over which we are powerless.

When we can do anything about a problem, we are up and about it. When we can do nothing, we fall into the habit of just sitting back and hoping that it will go away.

Worry's other name is fear. We foresee a situation in which we know that we shall not be at our best. We accept it, and then we sit back and do nothing about the situation in any of its aspects. We close the door of the mind to every sudden inspiration, every flash of courage or hope.

The worrier himself who takes the cup of life and with his own hands pours into it the wormwood and the gall.—Rochester Times Union.

Race Track For Ethiopia

Is Going To Build A Race Track Despite War Threats And Wants To Know How French Parimutuels Operate

The French Racing Association received a letter from the emperor asking full details, which were sent.

Discovery of the most powerful gun has ever produced, which penetrates a two-inch lead pipe as light does tissue paper, was recently revealed.

Kept In Circulation

Tunnel Officials Did Not Worry About Counterfeit Coins

We've been told of a strange experience that befell a lady motorist from Montclair through the Bell Tunnel. At the Manhattan exit, she was told that the fifty-cent piece she had just given the attendant at the Jersey entrance was counterfeit. The lady started to protest, but on second thought realized that she might as well pay up again and get another coin. She paid just as she was digging out her purse, a second guard came out of the change booth. "Never mind, lady," he said. "We just got word they palmed it off on some guy."—The New Yorker.

Heavy Sentence For Theft

Woman In Russian Factory Executed For Stealing Chocolate

A woman worker in a Leningrad chocolate factory was sentenced to death for stealing chocolate to sell on the open market. Sentenced with the woman, was her husband, who was also condemned to death for complicity. The watchmen in the factory were convicted of accepting chocolate bars as bribes and were sentenced to from one to two years' forced labor. Three other women workers who aided in the theft were ordered to spend three to seven years in prison.

Freedom Of The Press

If journalists did not have 100 per cent control of the press of their country, his power would be more than halved. Freedom of the press, like air and water, is not appreciated unless it is taken away, just as the open port and freedom of speech through it, said Staff Captain J. F. Patrick, who described the incident as unique in his 40 years of seafaring.

Another Name For Worry

Fear Enters Large Into Our Anxiety Over Greece's Problems

Measuring things by their influence on human happiness, worry must be put down in the front rank of bad habits.

The level of anxiety is that it actually concerns matters over which we are powerless.

When we can do anything about a problem, we are up and about it. When we can do nothing, we fall into the habit of just sitting back and hoping that it will go away.

Worry's other name is fear. We foresee a situation in which we know that we shall not be at our best. We accept it, and then we sit back and do nothing about the situation in any of its aspects. We close the door of the mind to every sudden inspiration, every flash of courage or hope.

The worrier himself who takes the cup of life and with his own hands pours into it the wormwood and the gall.—Rochester Times Union.

Race Track For Ethiopia

Is Going To Build A Race Track Despite War Threats And Wants To Know How French Parimutuels Operate

The French Racing Association received a letter from the emperor asking full details, which were sent.

Discovery of the most powerful gun has ever produced, which penetrates a two-inch lead pipe as light does tissue paper, was recently revealed.

Sounds Quite Simple

Young Lady Tells How A Locomotive Is Made

A young lady recently visited a locomotive works and then later told some of her friends how a locomotive is made.

"I went into a lot of small little boxes," she explained, "and you throw old stove lids and things into a furnace, and then you empty the molten stream into a hole in the sand, and then you pour it out and let it cool and pound it, and then you put it in a thing that holes holes in it. Then you screw it together, and paint it, and put steam in it, and you take it to a racing round and make a hole out of it. But one thing I forgot—they have to make a boiler. One man gets inside and one man remains outside, and they pound frightfully; and they tie it to the other thing, and you ought to see it go!"

A Law Unto Itself

Science Does Not Discover Science

"We do not know where great men come from," says Dr. Alexis Carroll, who thinks science can eventually produce supermen. "They come from the most unexpected places, and it is better to be honest and admit it. The physical standard of mankind can be raised by a higher level of economic well-being, which brings also greater opportunities for mental improvement, but genius has always been a law unto itself and probably always will be."

Guide: "This castle has stood for 600 years. Not a stone has been touched, nothing altered, nothing replaced."

Visitor: "Um, they must have the same landlord we have."

Per Centage Is Small

Horse Coming Back

Use Of Horses Is on Increase In Prairie Provinces

Canada's horse population has declined greatly during the past fifteen years, due, principally, to the invasion of the motor vehicle into the field of agriculture, so far as owned by the estates. Unable to compete with the speed and convenience of automobiles as a mode of transportation, the horse naturally suffered in prestige, and with the adoption of power machinery, Marquis horses were turned into muck-haulers.

But the number of horses in the Marquis herds in the Prairie provinces has increased, and the number of horses in Manitoba at June, 1935, places the horse population at 297,000, an increase of 1,000 over the preceding year.

Despite the continual decline in recent years, indications point to better days ahead for "Old Dobbin," with both horse population and demand for horses indicating the distinct increase in the last few years.

Horse breeders' clubs in the Prairie Provinces numbered 166 in 1934, an increase of more than 30 per cent over the number in operation in 1933. The number of registered stallions has increased 10 per cent in the last five years.

WORLD HAPPENINGS BRIEFLY TOLD

Reorganization of the whole Alberta relief system will be undertaken at the earliest possible date, Premier Aberhart stated.

Ninety per cent. of the 1935 graduates of the faculty of applied science and engineering at the University of Toronto have found employment.

C. G. Mitchell died yesterday.

Vice-admiral Sir Humphrey Thomas Walwyn has been appointed governor of Newfoundland in succession to Admiral Sir David Murray Anderson, whose term of office expires next spring.

H. C. Osborne, honorary director of the Dominion Drama Festival announced that Allan Wade, noted British stage authority, will be regional adjudicator during competitions in the 1936 festival.

Canadian Arctic explorer George Knobell, who swam at the Canadian National Exhibition at Toronto, said on her return home she may try to swim the English Channel next year.

As a gesture toward wiping out anomalies of the Great War, out-of-towners from the city of Vancouver have taken up the challenge on eve of a provincial centenary, decided to restore the German names of four towns.

For sale: One island, in excellent condition, on the city of Vancouver bank island, or the city of Victoria bank island, or the city of Victoria, for looking for a protective buyer. As an inducement, the city will build a bridge from the mainland to the island, if the price is right.

Sir Malcolm Campbell has purchased the Grand Hotel, one of Georgian residence near Egmont, Lady Campbell is authority for the statement that he is not going to settle down quietly as a country gentleman. "He will never give us his motor-racing interests," she says.

Discover Old Catacombs

Excavators In Poland Find Grim Relics Of Polish Revolt

Grim reliefs of the unsuccessful Polish revolt against Russian rule in 1863 have been found in a monastery at Vilna which was always related that Vilna was hopelessly built with underground passages, and recently researches were undertaken to find them. After several days' work tapping the floor of the 16th century Dominican convent, the excavators found an underground passage beginning near the altar steps. Below was the old Dominican cemetery. Rows and rows of defunct monks lay in open coffins on stone sarcophagi chambers, their eyes glistened with tears. Piled on each other in heaps were bodies of men, women and children, not decomposed, owing to lack of air. They were the remains of rebels who had hidden in the catacombs, been found and massacred by the Russians, and left, where they had fallen.

China's Women Pirates

Terror Stricken Travellers Found They Were A Reality

China's women pirates seldom seem but famous in song and story along the South China coast, were a grim reality to ten terror stricken Chinese travellers who were held captive aboard the coastal steamer *Lanting*. They and the ship were in the hands of two female buccaneers and 40 male subordinates for four days. The passengers and ship were robbed of \$250,000 in cash and silver and 50 pirates, after killing one passenger and wounding three, escaped in a small boat to a pirate stronghold.

The victims said the female captors were a gang of remorseless cut-throats and scoundrels of womanhood. Before escaping to shore they gave a brother of the slain passenger \$70 "to provide a funeral" and \$2.50 to each passenger "for transportation."

A loin of mutton was on the table and the gentleman opposite took the carver in hand. "Shall I cut it saddle-wise?" quoth he.

"No, sir, cut it birdwise," said his friend. "For then we shall stand a chance of getting a tail in our mouths."

Something like shipping costs to South Africa were paid for a cargo of 475,000 cwt. of wheat from Canada in 1934. Canada was the only source of supply, the South Africa deficiency of wheat arising out of a shortage of production.

A new plastic "glass" has nothing in common with ordinary glass, except its transparency. It is probably a cellulose derivative like cellulose.

Praises Men In North

Well Worth Working For States Bishop Of The Arctic

Arctic citizens, white and native, of Canada are decent, law-abiding people, well worth working for, Right Reverend Fleming, Bishop of the Arctic, a former Bishop of Saint John, N.B., said on his arrival in Winnipeg from the East over Canadian National Railways.

"I have a great admiration for the white men of the North," Dr. Fleming said, "not because he is a religious man. Some of them are. Many are not. But because he is a real man, facing hardships with courage."

The health of the Eskimos, due to a combination of causes, is better than it was. In the first place, missionaries, the Hudson's Bay Company, or the R.C.M.P. were all able to give medical attention in times of epidemics or sickness, and so the Dominion Government would reward the expenditure.

In the old days the natives simply died without care. Increase of hospitalization and better medical knowledge has given the natives a better chance at health survival. Trading and police post staffs had some knowledge of medicine which was available to the sufferer, where there was no hospital.

In an area of 1,000,000 square miles, which includes all of Canada within the Arctic circle and dips down to the 54th parallel at Fort George, two hospitals are operated under his direction, at Fort Resolution, Baffin Land, and in the village at the mouth of the Mackenzie River.

Eskimo youth graduating from mission schools were being absorbed into the growing life of the North. But they still wanted to go to the North, said Dr. Fleming. He told of boys from the Anglican residential school at Shingle Point, Mackenzie River, being taken on as apprentices in herding the reindeer recently brought to that part of the country. We look for Eskimos in this work.

Dionne Quintuplets Bowl

Offered as Gift

A surprise gift to a church will interest every parent, every child and, in fact, everyone who has ever heard of the world-famous Dionne quintuplets, born in Ontario. The unique offering is a cereal bowl created in honour of the five little sisters and their mother, Cecile. The cereal bowl is made of shining lifetime pottery designed in modern meat and cheese bowls. The cereal bowl is also embossed inside with a charming sculpture of the "Quinties". On the cover of the cereal bowl are the names — Emilie, Annette, Marie, Yvonne and Cecile. Beside being an ideal cereal bowl, it can serve as an ideal centerpiece for a child's birthday party. It is a distinctive gift by sending two trade-marks from packages of Quaker Oats, plus postage, to the Quaker Oats Company, Casketon, Sack.

Iron Jewelry Once Praised

Other Metals Replaced By New Discovery In 500 B.C.

Iron jewelry—not gold gems or diamonds—was much prized by the Romans before the Christian era and 500 years before Christ. Professor T. Leslie Shear, archaeologist of Princeton University, has discovered.

In his excavations in the Athenian Agora or market place, Shear found many pieces of iron, including heating cranes of iron, including necklaces, rings and bracelets. Dr. Shear's explanation is that iron had just been discovered about that time and represented a wonder among the various ornaments of gold, bronze, copper and other metals.

Speed Still To Blame

Bad driving, carelessness, bad maintenance and many other contributory factors to the toll of traffic accidents which cause so much concern today. But the main contributor is still Speed—excessive Speed. Sixty miles an hour, racing speed a few miles, is now a commonplace. Mental and muscular reactions have not speeded up correspondingly by means.

The office boy hadn't been there long when his employer looked up from an important letter and said irritably: "Don't whittle at your work, boy!" "I ain't working, sir," he replied; "I'm only whistling."

BRITISH TANKS GIVEN STIFF TESTS

During Tank Brigade exercises in the Aven Valley, the tanks were given a severe test, in being made to cross the River Aven. The recent heavy rain has made the adjoining meadows very boggy so a number of tanks found travelling difficult. Our photograph shows a tank successfully crossing a tributary of the River Aven.

Italian Soldiers Deserting

Hundreds Have No Desire To Fight In Africa

Ludwig Loring, in the New York Post says Italian soldiers are deserting to Switzerland, France and Yugoslavia by the hundreds. They have been deserting to save their skins. The Government may deny that deserters are numerous, but the Italian forces are preferring the uncertainties of a refugee's existence to the certainty of disease and death which await those who go to Africa at the Dictator's command.

Italy's American Party publishes interviews with a number of these deserters. "The traps leaving for Africa," says one, "no faith in the Government's optimistic reports. The Government may deny that deserters are numerous, but the Italian forces are preferring the uncertainties of a refugee's existence to the certainty of disease and death which await those who go to Africa at the Dictator's command."

India is growing richer rapidly, according to researches made by E. B. Sen, I.C.S., of Bombay, who has been sent to the Indian frontier in Bengal. The Government has just published his brochure in which he argues that the higher standard of living can be seen from the increase in the consumption of a large amount of articles imported from foreign countries, as well as from local production. The per capita consumption of cotton cloth in the beginning of the twentieth century was only 839 yards; it has now risen to 12,111 yards, and is still rising rapidly. He also points out that, while the average income has risen from 20 rupees in 1871 to 107 rupees in 1921, the rise in prices during this period has brought it back to 1911 levels.

This shows, he says, that the real income of the mass of the people has been doubled.

Up to 1930 Canada was a net importer of canned vegetables but since 1931 it has become a net exporter, an increasing extent, the exports in 1934 being higher than in any year since 1929 when shipments of tomato products to the United States (where the pack was short) were exceptionally heavy.

Ota Vrabham, Allendale, S.C., has collection of curious tree growths in the form of numerals, letters of the alphabet, etc. The collection contains more than 1,000 pieces.

Household Arts

PATTERN 5446

Forward march—the season for the Fall bazaar is done just that and we've fallen right in line and like its forward trend. Why shouldn't we when it adds that "come hither" look to the flattening of the bust? And the bust is the chief reason for the popularity of the brazier. The chief decoration, the ribs, are arranged in a fan-like design. You can make it of Shetland as well as other wools. So get out the needles and the bobbins and let your wonders add the chic of these matching accessories to your wardrobe.

In pattern 5446 you will find complete instructions for making this set along with an illustration of it and of course the pattern.

To obtain this pattern send 10 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermid Ave., E., Winnipeg.

There is no Alice Brooks pattern book published.

One Of Italy's Problems

Cannot Get Essential War Materials Or Foreign Loans

A Rome despatch told of Mussolini imposing new taxation to finance preparations for war, war itself. This will be a drain on the economy at home; it is hard to see how it will help him to buy materials abroad.

Italy is heavily dependent upon foreign sources for many of the materials essential to its military effort. She imports iron, coal, wood, cast iron, copper, machinery and gasoline. This she can only do by resort to gold, to foreign exchange, or to Italy's credit.

Italy can't get the loans in London after the experience of the United States with war debts; it is not likely she can get them in New York.

Therefore, apart altogether from the fact that sanctions might be imposed, economic isolation, Italy's position seems impossible.

She might be able to finance a short war; she certainly would be up against difficulty in a long one. All the gold she possesses couldn't begin to buy what a prolonged war would cost—even though the buying were cost—over Ottawa Journal.

Likes Travelling In Canada

Hitch-Hiker From California Says Canadians Are Kind

A young man from California, who did not intend to join the navy, Kenneth Kiley, 17-year-old Los Angeles college student, hitch-hiked his way from the California city to Regina, Sask., in seven days.

A dazzling smile and a wagging thumb were the hitch-hiker's secret of success, according to this young knight of the road, who covered the 2,500-mile trip with only 30 different lifts.

He said the smile helped him get along with the public.

Kiley was impressed with Canadian hospitality. Not only did he manage to thumb rides with greater ease on this side of the border, but many of his hosts treated him as a real member of the family.

This summer he had a 10-day vacation trip to the Yukon, where he was taking the thousands of grasshoppers hopping through the crops south of Regina.

Arab Form First Parliament

Nomads Of Near East Select Sheik As President

That the Bedouins, the Arab nomads of the Near East, have formed their first "Parliament" has been reported from Cairo, Egypt. Delegates from 75 Bedouin tribes, representing 1,000,000 Bedouins of Egypt, met under the presidency of Sheik El Arab S. E. Hamad El Basel Pasha. They formulated a code of laws, with questions as to the development of compulsory education among Egyptian Bedouins, protection of the rights held by Bedouins of the preservation and maintenance of their tribal customs, and the development of intellectual interests among the Bedouins of Egypt and those of Arab countries.

Task Nearing Completion

Book Of Remembrance Will Be Finished In Two Years

The Book of Remembrance which will be deposited on the altar in the memorial chamber at Ottawa will be completed in about two years. The names of those in service during the war who died of war disabilities prior to April 1, 1922, will be inscribed in the volume.

The work of compiling the Book of Remembrance is in the hands of the Canadian Parcels Service, who, when he was assigned to the task, undertook to complete it in five years.

He has now been engaged on the work for the past three years.

Wheat For Churchill

One And A Half Million Bushels To Be Stored At Bay Port

One and a half million bushels of wheat are being loaded at points on the Canadian National Railways in Saskatchewan and shipped to storage at Churchill on the Hudson Bay for the Saskatchewan Wheat Pool, it was learned.

Most of the wheat will be loaded for Churchill in the Prince Albert division.

Two hundred and fifty cars have been shipped to the port to date, which amounts to approximately 375,000 bushels of wheat.

The White House itself is valued at \$2,250,000 currently. But that isn't a lick to what the grounds foot up to—\$25 per square foot, for a total of \$19,885,975.

Paper lines have been invented for the tops of coffee percolators to prevent the ground coffee falling through and facilitate its removal.

An Oxford don says that he has kept statistics for years and finds that no red-headed man or woman ever won a first in history at the university. If this is how he occupied his time, it is surprising that anybody got a first, or even a pass.

British excavations in the Shetland Islands reveal remains of buildings of Vikings in the 10th century.

A Colony Of Forgotten People

Families From Southern States Live In Amazon Jungle

The discovery in the Amazon jungle of a colony of "forgotten" people, descendants of aristocratic Southern families, was made by Dr. W. H. Haas, bacteriologist and Professor of Geology at Northwestern University, Chicago. Dr. Haas came upon the colony during one of his expeditions into the Amazon.

The colony is named Shand, and is located on the banks of the Tapajos River, a tributary of the Amazon. The settlement, Dr. Haas said, is 600 miles inland from the ocean. The Indians of Shand are women who had moved to the tropics immediately after the war between the States. "She was living in the past," Dr. Haas declared. "I talked with her and she seemed to forget the world outside. Her feet and her primitive surroundings.

She recalled her father's extensive plantation back in Alabama, with slaves singing and working in the fields.

Dr. Haas met a woman who had moved to the tropics immediately after the war between the States. "She was living in the past," Dr. Haas declared. "I talked with her and she seemed to forget the world outside. Her feet and her primitive surroundings.

She recalled her father's extensive plantation back in Alabama, with slaves singing and working in the fields.

But the hopes of these plantation owners were soon blighted. The moist climate was not fit for growing cotton and there was no market for other products.

In the midst of dense forests and flocks of mosquitoes, they could not make contact with prospective buyers. Many of the younger Southerners, dissatisfied with the poverty and ignorance of the village life, returned to the United States. The others remained to eat the success of growing pumpkins, cocoa and beans.

New Optical Apparatus

Instrument Just Products Itself

For so long time the electrical industry has been troubled on account of the heat generated by an electric-light bulb tending to rot the flex which suspends it. In consequence, the British Electrical and Allied Industries Research Association asked three leading London scientists to find a remedy.

These scientists have been at work on the problem. The first, have found a device optical apparatus which makes it possible to use heat. Looking at a suspended electric-light bulb through the instrument, one can see heat like smoke licking round the hex, just above the bulb.

The second idea is to put other useful purposes, for instance, in finding the best methods of heating and ventilating rooms, theatres or factories. With a small model of a room one can see the draughts of air.

A test made with a heated rod made it look like a flaming brand. Even an outward cold hand placed against the instrument appears to be cool and one's breath, even in a well-warmed room, looks like a jet of tobacco smoke.

The Safety in Mines Research Board are already using the device for discovering the force and effects of explosives.

Recent Competition

Professional Beggars In Paris Want Protection Against Amateurs

Amateur competition is claimed by Paris beggars. With the approach of the winter season, the paper of French beggars—Le Journal des Mendicis—published a vigorous editorial calling on all professional charity-seekers to defend their interests against amateurs. This defense will be organized by a front organization among mendicants, points out that non-professional beggars are trying to crush the beats reserved for professionals. It demands that a united stand be made by all mendicants against beggars, especially those "enterprising upstarts."

All classes of agricultural workers in England and Wales, numbered 1,000,000, were employed in 1933, or 2.3 per cent., in 1935 compared with 1934. The latter year showed a decrease of 27,600 workers, or 3.9 per cent.

An Oxford don says that he has kept statistics for years and finds that no red-headed man or woman ever won a first in history at the university. If this is how he occupied his time, it is surprising that anybody got a first, or even a pass.

British excavations in the Shetland Islands reveal remains of buildings of Vikings in the 10th century.

Proprietor

Thursday Oct 24th, 1935

Albert Bond was a visitor to

Saskatoon last week.

Mrs. J. L. Stoudt has been on

the sick list this past week.

Mr. and Mrs. Regg, Pool are

away on a trip to Calgary.

Mr. and Mrs. V. Steinley, and
son, were visitors to Swift Current, last week.

Messrs. Kyle and Frank Paw,
late, sr., made a trip through to
Medicine Hat this week.

Today, Thursday, October 21,
is being celebrated as Thanks
giving Day throughout the Do-
minion.

A carload of relief potatoes
and vegetables arrived in town
this week for Saskatchewan
settlers.

For Sale—1 Storm door, 1
radio table, 1 violin, 1 rocking
chair.—For particulars apply at
the Empress Express office.

Mrs. J. Middleton, of Hanna,
Alta., has been visiting here for
the past two weeks with her
father, Mr. W. Stark, and brother,
Mr. and Rosalie D. Stark.

The regular monthly meeting
of the United Ladies' Alt. will
be held at the home of Mrs.
A. K. McNeil, on Thursday,
October 31, at 3 p.m. Kindly
note change in date.

Stewart Trail left town today for the Sheepeater mine at Sheep-
Alt., where he expects to obtain employment.

The Catholic Church held
its annual harvest supper on
Saturday, October 19. While
there was a good attendance,
the returns were not nearly as
large as in former years.

Whether of the past week
has been colder and a little rain
has fallen. While snow is re-
ported at other points, this dis-
trict has yet to receive its first
snowfall this season.

Charlie Young arrived back
from the week's work in the
harvest fields west of Hanna.
He reports that yields of grain
while good were not so large
as expected.

HEALTH
by

One of the most neglected
corners in the home is the medi-
cine cabinet. It is often a rest-
ing place for partially used
medicines, useless drugs and
samples sent by post, to say
nothing of toilet articles and
various odds and ends.

This collection of boxes and
bottles may have grown out of

someone's seven or eight, the
idea being that the various
items might be useful some
day. It may seem to be a waste
to destroy all unused medicines
at the end of an illness, but that
is just what should be done.

Drugs, if they are to be of
any real value, must be pre-
scribed by someone who knows
the nature of the complaint
for which the treatment is re-
quired and the effects of drugs
upon the human body. The
idea of giving some left over
medicine to someone because
the medicine seemed to be good
for somebody else is obviously
all wrong.

Most medicines deteriorate
and lose their potency when al-
lowed to stand. No one who
knows anything about drugs
would rely upon some mixture
or pills which had been stand-
ing in the medicine cabinet for
many months.

Many medicine cabinets pose a
real danger because in them
will be found powerful poisons.
Sodium is there any reason for
keeping these, but if they are
kept, they should be in a locked

THE NEW FORD V-8 FOR 1936

Why do we say The New Ford V-8
for 1936?

What is new about it?

Of course the newest engine in the
low-priced field is still the V-8 engine.
Since Ford made it available to all car
users (keeping it an economical car with
fewer cylinders) the Ford V-8 has
been the newest engine on the market,
and remains the newest for 1936.

You may buy a car on minor "talking
points"—some specially advertised fea-
ture—with the car thrown in—but, after
all, it is the engine you buy when you
buy a car. Hence we put the engine first.

Other new points about the car
make a long list.

Its lines are much more beautiful. The
hood is longer and sweeps forward over
the distinctive new radiator grille, giving
the car a length and grace that are
largely impressive. The fenders are
larger, with a wide base. Horns are strength-
ened behind circular grilles beneath
the headlight. New steel wheels.

Ford upholstery—always of sterling
quality and excellent taste—is rich and
enduring. The appointments of the car
have a new touch of refinement. There

is no question about the increased
beauty of the Ford V-8 for 1936.

In more practical matters, many
improvements have been made—
Steering is made easier by a new steer-
ing gear ratio. The cooling system cir-
culates $4\frac{1}{2}$ gallons of water through a
new larger radiator. Natural thermo-
syphon action is assisted by two cen-
trifugal water pumps. New style hood
louvers permit a rapid air-flow around
the engine.

Easier, quieter shifting of Ford gears
—The gear shift lever now travels a
shorter distance.

The two qualities you want in
brakes—Brakes that stop the car with
sense and certainty. Ford Super-Safety
Brakes of the long-tested, fool-proof,
mechanical design.

Safety—as always—in the electric-
ally welded genuine steel body. Safety
Glass all around at no extra cost. Hun-
dreds have written grateful letters be-
cause this glass has protected the safety
of their families.

A car you can drive without strain
all day, if you like, in city or country.
Steady, holds the road, responds to the

driver's touch like a well-trained horse.
You don't have to "push" or "fight" the
Ford V-8—driver and car easily get
on terms of good understanding with
each other.

An engine has much to do with the
roominess of a car. Very much indeed.
A long engine uses up car space. The
compact V-8 engine permits much of the
ordinary engine space to be used by
passengers.

It really is a great car in every way.
This 1936 Ford V-8—the finest, safest,
most dependable Ford ever built.
Get complete details at your nearest
Ford dealer.
